---

Eric,  
About 13,000cy of material were removed from the Arco source control action. That includes riverbank soil (mainly under the concrete revetment), beach sand, & nearshore sediment. Tom G would have more precise volumes for you, but he's not in the office today.  
Jim

Subject: Volume Estimate for BP/ARCO

Jim, do you have a volume estimate for the amount of contaminated sediment removed at the BP/ARCO site?

Thanks, Eric
